SPONSOR A TECH HELP-DESK

As you know, Cyber-Seniors' mission is to train young people to act as digital mentors for senior citizens who wish to build technology skills and expand their social networks. High school and college/university students throughout the U.S. and Canada undergo formal training, followed by 16 hours of volunteer mentoring. As an extension to this program, we are offering Cyber-Senior mentors an opportunity to set up and staff Tech Help Desks in libraries and senior centers as well as other community hubs such as banks and coffee shops in the city/town where they live. Mentors are coached and supervised by a representative of Cyber-Seniors and the impact of this service is being evaluated by administering a short survey to seniors who visit the Tech Help Desk.

Many of the organizations for which the teens will be providing this service are non-profits with limited budgets. This is an opportunity for a company to gain exposure in their community by sponsoring one or more Tech Help Desks in the form of a \$1000 donation. This small contribution will go toward covering the cost of wages, transportation, uniforms and any necessary electronic devices. In recognition of your support, we will place a sign prominently displaying your logo on each Tech Help Desk your sponsorship supports. We can also make information on your company's products and services available to anyone who visits the Help Desk.

If you are interested in supporting this impactful initiative please contact charlene@cyberseniors.org.
